

My Sunshine

Kimbastaff Cassanova CD ET – Dooee

Dooee was born on 21st October, 1998 by c-section, I was at the birth and helped bring all 7 of his brothers and sisters into the world, it was my first litter. He was sold at 8 weeks along with his litter mates, but apparently he cried non stop for a week and was brought back to me. (some say he did it on purpose) we've been together ever since.

While his show career was nothing to really brag about, I will anyway - he only gained one Challenge and a few reserves. However he did manage to beat some great dogs on different days. His movement has always been his greatest show asset. He was always being abducted by junior handlers as he was a breeze for them to handle, there were a few adults who loved to handle him also. At age 3 Dooee completed his endurance test consisting of a 20 km run in 2 hours with vet checks at start and end to test fitness levels, he passed easily. Dooee has his CD obedience title and passes towards his CDX however family issues prevented us from completing any further titles. During his lifetime he has done many

obedience demonstrations showing that Staffords truly are a versatile gentle breed.

Dooee loves puppies and has helped raised all the Kimbastaff litters over the years, as we are no longer breeding and Dooee heads into his twilight years he is now instrumental in the rehabilitation of many of the rescues that we take in teaching them manners and general Stafford behaviour.

The years have been good to Dooee he is starting to go grey around the muzzle but not too much, he has difficulty jumping up into the car at times, but I'm always there to help him. He sleeps under the covers instead of on top. He has slowed slightly, but can still manage a good game of catch me if you can. He is and always has been my best mate. I hope we have many further years of enjoyment and learning together.

Donna Treadwell - Kimbastaff
